

aquama®

Using the Falcon® aquama® via an application

The Bluetooth -  - should activate.

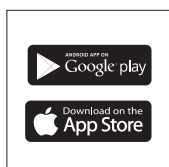

> **Filling a spray**

1. Unscrew the spray head from the body of the bottle.
2. Place the spray under the spout.
3. Press «fill spray» on the application.
4. The spray fills instantly and stops automatically at 600ml.

> **Filling a container using the spray gun**

1. With one hand, take the pistol that hangs from the hook on the right side of the machine.
2. Orient it over the container.
3. First press the trigger (it is possible to block it by pressing the red notch).
4. With the other hand, click «start» on the application.
5. The gun is activated immediately.
6. Press «stop» on the screen to stop the flow of the solution.
7. Then release the trigger after it stops (this prevents the gun from remaining under pressure).
8. Put the gun back in its place.

Consumption will be automatically debited from the customer account via the application.

Account available on <https://aquama.ch/fr/Mon-compte>
